

MacGregor vessel reintroduction inspection

Original equipment manufacturer (OEM) condition checks and technical inspections for anchor handling tug supply vessels, platform supply vessels and work barges

At your service

MACGREGOR

Designed to perform with the sea

Although a sustainable alternative to decommissioning during quieter periods, warm or cold vessel stacking can negatively impact the operational capabilities of equipment when a vessel is returned to service.

To increase operational efficiency and minimise costly downtime and breakdowns, MacGregor offers reintroduction inspections for offshore deck machinery.

A reintroduction inspection includes equipment upgrades and advice on modernisations to ensure that present and future market requirements are met.

A reintroduction inspection can be carried out on the following equipment:

- Anchor handling/towing winches
- Standard deck cranes
- Shark jaws and towing pins
- Hydraulic mooring winches
- Other standard deck winches

A reintroduction inspection includes:

- Up to a two-day inspection per vessel by our equipment specialists
- Detailed OEM inspection report with service and spare parts recommendations
- Separate report for any necessary upgrades or modernisations

Special introductory rate for inspections:

- 10% discount on any MacGregor services or spare parts purchased as part of the inspection report
- Full refund of inspection costs when MacGregor-recommended spares and services are purchased

MacGregor inspection programmes are available globally and carried out by our worldwide service network. For further information, please contact your MacGregor account manager or send an email to: lifecycle.odm.support@macgregor.com.

MacGregor shapes the offshore and marine industries by offering world-leading engineering solutions and services with a strong portfolio of MacGregor, Hatlapa, Porsgrunn, Pusnes and Triplex brands. Shipbuilders, owners and operators are able to optimise the lifetime profitability, safety, reliability and environmental sustainability of their operations by working in close cooperation with MacGregor.

MacGregor solutions and services for handling marine cargoes, vessel operations, offshore loads, crude/LNG transfer and offshore mooring are all *designed to perform with the sea*.

MacGregor is part of Cargotec. Cargotec's class B shares are quoted on NASDAQ OMX Helsinki Ltd.
