Crane Simulator Training

The Offshore Crane Simulator Training provides a simulated real life operation in safe environment.

TTS Training Program

TTS GROUP ASA

Product Description

Typical content in the TTS 3D simulator Training Program:

- Initial crane theory
- User interface and Operator Chair
- Crane Start Up Procedure
- Basic Crane Operation
- Alarms & Error Message
- Load Handling on Deck
- Load Handling from deck to sea
- Splash Zone Operation
- Active Heave Compensation AHC
- Constant Tension CT
- Landing and Lift-off from seabed
- Ship To Ship/Harbor/Personnel
- Adverse weather conditions
- Effective Load Handling
- Safe Operation
- Training on tailor made loads
- Unexpected scenarios
- Emergency lifts
- AOPS/MOPS
- Blind lift scenarios

All simulations can be done at our Offshore Simulator Center. Theoretical and Hands on Training is provided as a part of a Simulator Training Program.

Main Features

By using the TTS Crane Simulator Training it will be easier and more flexible to arrange training for the crew.

The crew could be easily updated and new crew members can quickly achieve a high knowledge level.

- Training of Operators in a realistic environment
- Full Simulation of Vessel & Crane Operation
- Reduce risk by having trained & well prepared operators
- Familiarization with crane operation
- Familiarization with vessel & crane movements
- Increase Efficiency
- Training programs for experienced personnel and novices
- Train on critical operations
- Prepare for unexpected scenarios
- Avoid mistakes
- Prepare & Train for specific operations

Contact

Contact us for more information on how to order all training on your TTS crane.

tsb@tts-marine.no

Together we will prepare training that will meet your requirements.
